Discover Objective Root Cause Analysis ORCA™

The ORCA™ team leverages highly specialized tools and decades of produced water experience to provide clear solutions. Our approach involves performing infield pilot tests, with the goal of having initial results ready to submit for review quickly. Upon completion of our analysis, our team of specialists provides a clear view into the key factors affecting production. Whether needing to debottleneck Brownfield operations and enable additional hydrocarbon production or mitigate project risk and provide a high degree of assurance ensuring adequacy of Greenfield designs, ORCA™'s expertise will enable greater oil and gas production and add value to each project.
