CETCO
ENERGY SERVICES

A Minerals Technologies Company

CLEAR SOLUTIONS
for complex fluids

Offshore facilities face increased water production from aging oilfields as well as more stringent environmental regulations for overboard discharge or re-injection. As the industry leader in water treatment solutions for the offshore oil and gas market, CETCO understands the difficult challenges that our customers face regarding processing and treating produced water to maintain oil production without interruption and responds with the expertise customers need.

ABOUT US

CETCO ENERGY SERVICES (CETCO), the trusted partner and complex fluid experts equipped and ready to solve your fluid challenges; delivering clear and proven results by increasing operator efficiency, reducing downtime, and maximizing output while safely protecting the environment.

**16 WORLDWIDE

OUR EXPERTISE

- ✓ Global Water Processing Specialists
- ✓ Offshore Surveying & Analysis
- ✓ Offshore Process Optimization
- ✓ Produced Water Equipment Rental
- ✓ Permanent Equipment Packages

FPSO Water Solutions

Floating Production Storage and Offloading FPSO, facilities have unique challenges for water treatment due to remote locations, deep-water, weather movement and practices such as storage of produced water in slop/ cargo tanks. If the produced water or slop water cannot be re-injected or properly treated and discharged overboard, off-spec material has to be transported onshore for treatment resulting in significant expense. CETCO has developed a comprehensive program for short, medium, and long-term remediation which includes field surveying, troubleshooting and remediation technologies. CETCO supplies pilot equipment, rental equipment and new build process equipment, all of which are tailored to the specific issues that our customers encounter.

Features & Benefits

- Patented water treatment technologies
- Meets all statutory requirements
- Reduced operating costs
- Increased production
- Extended asset life
- ORCA™ Services, offshore surveying, engineering and optimization studies
- Greenfield/Brownfield permanent produced water equipment for primary, secondary and tertiary treatments
- Temporary process equipment & technologies has produced water topside equipment for rental
- Slop water treatment processing packages
- Heating/Cooling Medium filtration treatment
